

MONTESSORI TRAINING CENTRE OF BC

Collaboration for Meaningful Work with *Karen Pearce*

Karen Pearce is a Director of Pedagogy at The Montessori Place in Brighton, UK, where she mentors the Children's House guides. She has 33 years of Children's House experience and she lectures and runs workshops across Europe. Karen offers online Montessori mentorship programs to support guides in putting theory into practice.

In this workshop we will explore:

- How to reflect upon developmental principles that guide and influence the actions of the adult in their day to day practice.
- How we support the child in their capacity to choose and what implications does this have on the child as they travel along the path to normalization.
- What are the different types of choice that we may observe in our work with the children and consequently how does this impact and influence our responses.
- Constructive standpoints will be offered in this workshop, guiding the adult from theory into action.

Workshop attendees will leave with practical advice and reflection points for both themselves and their interactions with the children.
